

KARI'S LAW CERTIFICATION

OFC.PHN.KARI.202404

Federal Communications Commission regulations require that a multi-line telephone system ("MLTS") send a notification to a central location at the facility where the system is installed or to another person or organization. If possible, this notification will be sent contemporaneous to the call, and it must be sent to a location where someone is likely to see or hear it.

In order to comply with FCC regulations, Pavlov Media, Inc., and affiliates must have the correct service number or email for this central location, including as applicable, room, floor, or suite numbers. Please provide this number or email below.

Please note that, if necessary, this central location can be updated by emailing phone_techs@pavlovmedia.com.

The FCC requires you to be notified if emergency services were called, fill in the method below that you would like (at least one option must be filled in):

Email Notification (Preferred):

Phone Extension Call Notification:

Note: We can have notifications sent to an off-net number but cannot guarantee its arrival on a third-party provider. If you choose to use an off-net number, please provide the 10-Digit Number and whether it is for Voice or SMS:

VOICE

SMS

I hereby certify that my organization wants our internal 911/Kari's Law notification sent to the above central location, and that it is a location where someone is likely to see or hear it.
